Mr. Walter S Campbell
The University of Oklahoma
Norman, Oklahoma.

Dear Walter: I ran over your note of 5/27/54. My Scandinavian friends at Houston are building a new light compact effective Geiger counter, so when tried and tested we will know the latest, please do not misunderstand me a Geiger has no trace of a flint spear, lance or arrowhead or lead slug, copper and brass shells such as those old 45-70's you know them all, old horseshoe etc. I had your Cedok Walls pit book with me reading it carefully I found Bill Dixon's wall, that counter shattered like a duck we found one copper arrow head and the flints in digging up old different size lead bullets or slugs. You spoke of Robert M Peck's notes in Kit Carson or Adobe walls, as they better than Geo B. Grinnell's notes in Bent's Old Fort page 43, Vol XV Kansas Historical. This summer I crawled up on that Butte Dixon shot the Indian on, I had a borrowed Geiger it started clicking as that bluff is full of old lead slugs. The aerial photos show the white line of that old adobe walls. Geo B. Grinnell used to stay at our place, he was fond of father who had a double cross eyed cow puncher China Burger drive him around to all the Indians, Dr. Grinnell was an unusually fine person; I read all the Kansas Historical sketches to Charley Good night, he said they were the nearest to facts, he would
