

Recently there has been installed a new Sargent's improved dryer, and the wools retain all the natural life and luster belonging to them, leaving the fibre uninjured.

Dyeing

The wools used in the manufacture of Pendleton Indian Robes are dyed in the fleece. This insures a proper distribution of the dye. Nothing but the finest grades of dye are used in the Pendleton Mills and all the colors are guaranteed to be absolutely fast.

These robes are all washed after they have been woven, before finishing, and if any fault existed with the dyes it would be discovered in the mill before the robes were placed on the shelves. The Pendleton Mills guarantee fast colors.

Designing Indian Robes

One of the reasons why the Pendleton Indian Robes were a success from the time the Mills commenced to manufacture them, is that careful study and thought is given to the patterns or designs. They have at the head of this department a graduate of a textile school and school of design, who thoroughly understands, and is master of the
