

believed the white man tried to poison him and left in high . This last affair may have given rise to his resentment, but no one was guilty of any intention of doing him any harm, he was very well treated. And except the refusal to give him whisky, had what he wanted. And more than any other Indian obtained or expected.

I do not believe, that, at anytime since the donation of presents by the Indian Peace Commission at Medicine Lidge ~~Can~~ Creek, in October last, to the Cheyennes and Arapahoes, Sa-tan-ta has been satisfied or peaceably desposed; he complained then, bitterly, that favoritism was shown ~~therethose~~ those Indians both in the quantity and quality of the food presented. He complained that Arms and ammunition were presented to those tribes, while his got none. And he had good grounds for making this complaint.

I have been extremely *careful* in my conduct toward this Indians so as to give him no just ground of complaint. If he has anything to complain of, it is the result of his own drunk~~in~~ folly.

The white men alluded to in the letter were on the South Side of the Arkansas. And it was expressly understood between the Commission and the Indians, that white men would not be permitted to locate ~~or~~ hunt south of that river. The Indians understood it that way , and I believe that Sa-tan-ta considered it ~~pref~~ perfectly proper to attack the property of any parties found. The ~~Commamon~~ route as a route of travel was not so designated in the treaty with the Kiowas, though it was, at my suggestion, designated in the treaty with the Cheyennes and Arrapahoes. I am of the opinion that the Kiowas will ^{themselves} perfectly right in attacking Mexican on that route next summer.

I have been informed that the ~~Southern~~ Southern Indians prepare to join the Cheyennes and Arrapahoes in a war against the Kiowas and Osages and Pawnees.

I make the above statement in connection with the enclosed letter, as my position with reference to Inidan Affairs has been much misrepresented.

I am Very Respectfully
