The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.
EXAMPLE.—To find the number of days between June 3, 1892, and February 16, 1893. The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412. Subtract the first from the second product—4, e., 154 from 412, and the result is 258, the number of days between the two dates.

EXAMPLE.—Interest on \$50 for 30 days at four per cent, 50X30 = 15.00, which divided by 90 = 16 2/3 cents—the required result.

CHEROKEE PIONEER DEAD
Mrs. Julia Ann Thorne Succumbs to Heart Disease.

TALEQUAH, Jan. 23 (Special)
This city and Cherokee county have lost another of their fast-vanishing pioneer Cherokee citizens in the passing of Mrs. Julia Ann Thorne, who succumbed to a sudden attack of heart disease at her home here Tuesday evening.

Mrs. Thorne, nee Terrell, was born near Woodall, eight miles from this city, in 1859 and had spent her entire life in Cherokee county. She was married in 1880 to W. L. Thorne, of a well-known Cherokee family. The family consisted of six sons and four daughters, three of whom preceded their mother in death. The remaining sons and daughters, all residents of this city, were at the bedside. Mr. Thorne died 14 years ago.

The funeral was held from the family home Thursday afternoon.
