27. Center Pivot Irrigation handouts and notes
28. Interviews regarding irrigation, 1986-1987
29. Tables regarding wells, pivots, and water usage
30. Nebraska maps and papers regarding center pivots

Box 12 consists of research data compiled by Leslie Hewes for his Ph.D. dissertation, *Geography of Cherokee Country of Oklahoma*, University of California, 1940. The data, drawn on township maps, is divided into two parts 1) allotments by degree of blood, intermarried or freedmen (prepared by NYA workers in the 1930's) and 2) classification of lands and appraisal value per acre (prepared by Elma B. Hewes in 1935 or 1936).
