

WORLD ART THERAPY FOUNDATION

13046 Leader, Suite 981
Houston, Texas 77072
713/879-6441

Gerald E. Jolin, J.D.
Founder

DEAR FELLOW FIGHTERS AGAINST DRUG AND ALCOHOL ABUSE:

The BAD NEWS is that the multi-billion dollar drug war is lost! "JUST SAY NO" didn't work! All CRACK DOWN - no UPLIFT = No Progress.

The GOOD NEWS is: There is HOPE! The world is convinced of the above.

Many Federal Judges are pointing the way to win -- through education and treatment. (See enclosed clipping)

Please read my April column in the Houston Recovery Journal, enclosed. It describes how art education can be one big answer. We believe art training is the most effective type of education, both for prevention of addiction and as after-care for abusers.

The first step is to collect compelling data from the brave souls who are out on the front line, proving education and treatment really works. Then with voluminous hard facts and clear proof of methods that work we can go to the United Nations, and national, state and local legislative bodies and get the massive monies for massive programs for real success in this war the world must win. America can set an example.

Our new foundation needs ^{not for Mrs. M.} your contributions of whatever size and your permission to put your name on our masthead as a member of the advisory board. We need your influence on your peer group. The hard work that took you to celebrity status earned you many friends and admirers.

You will receive a quarterly accountant's report and a frequent news letter on progress.

You will have the satisfaction of proof that you did your part in helping to win a necessary victory for this and future generations.

Sincerely,

Gerald E. Jolin, J.D.
