Hon. C. Guy Cutlip,
Wewoka, Oklahoma.

Dear Guy:

I enclose copy of my telegram to the Capitol Democrat at Wewoka, and also copy of their reply.

I found that due to press dispatches, many persons throughout the United States reading the name Cutlip, were prone to think it was a typographical error or a mis-spelled word contest.

My wire to the Democrat was for the purpose of proving my assertions that 'Cutlip' was really a name, despite the insuations by some to the effect that it might have been something else before the Arkansas migration set in.

Upon scanning the Democrat's reply today, a Reporter for a Dayton, Tennessee newspaper, remarked ---

"These Indians have such funny names that he would not Darrough report it until postive that it was not pro-evolution."

Since clarifying this matter I find everyone hereabouts is flocking to your support as your ability as a writer, lawyer, and mayor is well known, and Wewoka will not only have an efficient Mayor, but one whose name alone will bring, as it has done in the past, considerable favorable publicity to the capitol of Seminole County--- in fact, such publicity as has not been enjoyed by Wewoka since the days of Bud Brinsfield who finally was barred from participating in the dances in IZARD County.

With kindest regards and best wishes for your success,

Yours very truly,

Jno. E. Dickson

Mr. C. Guy Cutlip
Wewoka, Okla.

My dear Mr. Cutlip:

On the second page in the fifth column of today's Oklahoma City Times appears a picture, together with an article advising the world that C. Guy Cutlip has been elected President of the Wewoka Chamber of Commerce.

This is the first time I knew you had a son. The picture looks very much like you looked 25 years ago when I as a boy of 10 or 12 years old knew you.

I am enclosing the clipping for fear you will overlook it.

The direction in which the eyes are cast and the expression on the face indicates that a pedal appendage of a comely female may be exposed.

The picture really looks like you did back in the years referred to, with the exception that the helix, antihelix, lobe, tragus, and antigragus are missing from one side of the head. How come????

Sincerely,

J. E. McKeon
