

## Work Program.

1. Speaking dates- with invitations to some other particular candidates such as on one occasion: for county attorney- another night the county judges, district judges, etc., named in the circulars and specially invited.
2. Those men who are dissatisfied with guardianship matters should be contacted and placed in a systematic distribution of the poison. Circulars should be furnished them in way of affidavits of their own- and let it be shown of their own initiative. Each should contain a statement that: " I did not write this statement, I hired it written, but it states the facts better than I could do."
3. In connection with this at least six good, common, trustworthy men, who are first and foremost for your candidate, should be properly instructed and sent out on a "whispering" campaign- given certain districts to cover- and see that the district is covered. They should be furnished with affidavits and maybe circulars for distribution as noted in number two above. Their plaint should be that such a man should be exposed to the public. These should be used to reach the women voters. They should be well advised as to disturbing facts from one to eleven hereafter referred to.
4. The Oil Field Journal- J.F.Zimmerman, editor,- is open to your uses- information will be used by it- discretely, but effectively. It should be remunerated to whatever extent it has lost by not being patronized by opposition.
5. Any and all publications should be used by and from those dissatisfied, not the candidate, it should reflect a personal grudge.
6. All public meetings should be attended by "poison" squad and others. Not blatant, but earnest. Wherever and if possible, public speakers should attend those gatherings and laud your candidate.
7. Laudatory circulars should be placed in every home showing record of court and comparisons.
8. Music should be provided for speaking dates. Sturgeon, Bob Chambers and two others for quartette. Harold Steph and his crew. Also Charley Logan's boy and his string band- it may be that Parsons who runs shoe store north of Postoffice can also furnish some entertainment. This point should be stressed in circulars of the speaking dates.
9. Stickers for cars should be provided and if possible distributed to cars by Boy Scouts. These boys should be cautioned not to stick on cars without consent of owner. The should simply be "Vote for and then candidates name sufficiently large to be seen at considerable distance.
10. Paper carriers of county might be used for distribution purposes, this should be investigated.
11. Some strong men who are enthusiastically for your candidate should be contacted in each precinct and urged to analyze the conditions, suggest remedies for any difficulties found; see his friends and neighbors. These men should be chosen for their patriotic support in no event should men who work for money be used.
3. Proper parties should contact Newoka and Seminole churches of the

**Things that should be distributed  
by individual workers.**

1. The first thing to be stressed should be that the "political Control" of the opposition is an ex-convict. That he has been the recipient of many favors- where practical particular instances should be cited such as: the old lady who told Hicks Epton that the ex-convict had agreed to get a certain appointment for \$10.00- The McPherran case where \$5,000.00 was paid to him without the solicitation of guardian or any one else, for an eighty acres of land for which he paid something like \$750.00. Records should be be quoted, pages given, etc., of records. Also the Huckleberry matter where a deed was purchased from a full blood and the judge refused to approve same because the Huckleberrys were unfriendly. Afterwards the ex-convict purchased the same interest for considerably less. "A friend of the poor man" indeed.
2. The offer to advance \$3000.00 to the Union boys at Seminole for purchase of a printing press. The statement to John Cooper that the money would be forthcoming from a minor WHO ONLY HAD that amount of money, but that the minor had a rich aunt in Hughes county who would take care of the minor. That it was suggested that a fifty dollar lot in Seminole be purchased and a loan would be approved for the \$3000.00.
3. The Sister Harjo matter in detail.
4. The connection with the Farmers National Bank.
5. For word of mouth only, the matter of the poor and needy orders where all went to one merchant of Wewoka and from which ten per cent was received. The merchant raised the prices to take care of the commission. A horrible thing.
6. The Peter Cooper guardianship matter. Am not advised as to details but Horsley and the records or Peter himself can supply.
7. Statements made in the presence of Earl Davis and others that no guardianship loans would be made except to friends and that the court was functioning for political purposes and advantage of its judge.
8. The case of Judge Mills where a \$50.00 loan was approved by the probate attorney, amply secured, but refused because Mills had not supported the judge in a prior election.
9. The statement in the presence of Horsley, W.O. Wallace and others that no deed to the Key Hardware company would be approved because Ben Floyd, as a school board member, had refused to elect his wife as school teacher in Wewoka.
10. The approval of guardians report in Peter Johnson case and when confronted with the record his statements to Cooper and Kidd that he was "tied" to the boys of the Farmers National because they had financed his campaign.
11. As a matter of incompetency, his refusal to instruct juries in cases appealed from Justice courts because he was trying de novo and instructions were not allowed, and the very next case where varied instructions were requested, he gave them all, although inconsistent. See Horsley and Marshal Huser.
