

Washington. Most of..a lot of (not clear) and most of 'em..

If you've got some people that have been with you all the time. (not clear) a good deed for the day. You're paying more than what our wage rates would call for. But we aren't familiar with the payroll reports and pay raises. And we know that this is going to have to be one-sided. But I don't think we'll have many problems.

(Participant, man:) There's one uh--say somebody gets into it with this other man and uh laborer is this participant.. Is he covered with insurance and is it with the housing authority or is it with..

Leader: With the housing authority. We will put in out of the program \$125 oh \$150 dollars a year. For insurance.

(Participant, man:) And will this participant, say there's a man and his wife and a fourteen-year old boy and wants to work on this house. These houses. Can all three of those be covered? Or just one of 'em?

Leader: The two adults there's no question on 'em. Uh, this I would have to ask on that minor--this is--this is--

(Participant, man:) I know one girl out here in particular that I have in mind. That she's a worker herself. In fact you tell her where (not clear) and they'll..they'll be done before (not clear) And she may have her fourteen-year old girl and twelve-year old boy and an eight-year old boy. All out there with her. Digging or putting on roof, or she'll do anything that anybody else will do, she'll try. And uh she has several kids and probably the whole doggone family will be out there trying to get this house ready to go.

Leader: Well, now this is the concept of the program. That everybody's at work you know of all ages and everything else. This insurance situation (not clear) a couple of others and I think provided (not clear) would..would..would be covered.
