MORE PHILOSOPHY

And during the time we're living they say this way. God has created you with eyes and ears, and everything. Move, sound--it belongs to you. It given to you. Give you that life. Just like the Bible says. Indian, he knows that. He made you to live over there. You see that old man over there? You live that long. He fixed you that way, and a woman the same way. He fixes us. All right, next thing is getting over there. Between here and there lot of things going to happen to you. Lot of things, you don't know what's going to happen, is going to happen. But think in your mind all the time you're going to get there. You're gonna. It was given to you and you're going to get there. And maybe you'll get there and maybe you won't. Most of the people in life don't never get that. Well, if you get there, well then you can look back and see what good things you've done. What wrong things you've done. Still God is with you. He let you live to that far. And don't give up. Think that way. You're entitle to it or your children is entitled to it. Even to those that's not even born are entitled to it. That's where we're all equal. And it's given to us and try to respect that and try to be good to one another. Because today you're here, might be gone tomorrow. So for that reason we all have the same privilege. We all same, alike, of course, some (word not clear) and (word not clear), and all that. But same time, it's day and night all the same. We all share alike.
