This is, I don't know if you can see this very well, 'Jack Rabbit's family. Now, thefers a lot of talk, nowadays, about the big dept we' have our offspring. They don't seem to' give us any credit for. what we've given. It's pretty idiscouraging sometimes. This represents what we've given, we've handed them the moon. . It.cost a lot of mioney and we're in dept all right, but we've given them the moon. That was quite a cost about making it--50 years. I never dreamed that would ever happen. 'This.hand at the base of this thing represents the thousands of people who efforts reached the moon. Some of them will never be heard of. This represents the old poy that. pushed the broom, and the machinist, the carpenter or what have you: This is the workers' 'händ. This sophisticated represents the technicians of Congressmen' who get apprafriations for these projects. You know it takes a lot of. people workifg, thegether. This baby represents our offspring. We/ve. given him:his 4 • took him around the moon. He's got his boot now. He's got to be able to wear his boots if he is going to make his tracks. We've gifven him his boots; and his feathers, and we handed him the moon. So iths up to him, now, if he can't settle on a street corner, and grow ong hair and say, "Gimme.". He's got to be able to"wear his boots.

## CURIOSITY VICE VERSUS

This iṣ called "Curiosity Vice Versus.". 'It's any kia "from 2 yeàr old to 8-9 with a terrapin, or toad, finog, or grasshopper. See, how he got his
 about him. The fascination of a terrapin, tond frog or something. You buy him toys, and it seems that the quicker, they can tear them up and throw them away, the better it is to get new ones. They get an old
