

in the sand country or where its lower, they get bigger. It's better.

We might find some of them stickers over here.

HOBBY HORSE PLANT (Baldwin's Ironweed) :

Yeah, we use them (another plant) for the hobby horses.. Grandpa used to make them like this. Made a lot of them like that. They ain't no horses, but they give them the idea of how to ride them. They're not horses, but we call them horses.

(Which grandfather was that Ray?)

That scout.

(Blackbear?)

Yeah.

(Do you remember Lond Chief?)

STINGING WEED:

There is a stinging weed. You step on it. You know what that is?

(No.)

Stinging weed.

(Stinging weed?)

Yeah. You just touch them right there, you'll find out. Theyll burn for a while. It just makes you itch and burns. Go barefoot, you'll hit them.

Just stick your hand over there like that, it'll go to burning. Call it stinging grass (Apache name) I think they got a name for that. I don't know what the English name for that is. Stinging grass.

HARD STICKERS:

I can't find that. Yeah, there it is right there. See the flower? They got pretty flowers. They tall. They call that vines. And these when they fall they turn into those stickers. That's what I was trying to find.

(Oh, like those goat heads?)
