

up at the house. See how pretty they look?

(Yeah. This is where the flower falls off?)

Yeah. Here is one see.

(Oh, yeah I see.)

That's the one. Its not..still green yet. But man when they get matured they just like wire. When they stick you boy I mean they just stick you too. I don't recommend that for nothing. But I just want you to look out for this. Don't never step on them. Boy you gonna..it just pains, aches. Just like a toothache. Just like a wire. Just like, not poisonous, but when you step on one of them you know you stepped on a sticker. Here's that stinging weed. It won't sting for about 5 or 10 minutes. I showed that to Bittle and Judy. Heh heh. Pretty soon the whole class was doing that. It makes you itch. It'll go away. You touch that on your leg now, it'll form a kind of blister like that. But it'll go away. Grandpa used to show me all of this.

(Just wondered what was in the hole.)

Oh, just one of them mountain boomers. Ever see one of them mountain boomers? Like a lizard. It's not hot enought for them. When it gets hot there's a bunch of them. There's lots up here. One day when it's hot, we'll make some grasshoppers.. Kill some grasshoppers. That's what I was telling you about. That grass. That grass that penetrates. Goes through your clothes.

(Yeah, it's got a barb on the end of it.)

(Did you use to do that?)

Yeah, that's the way I learn. My grandfather used to be a boy and he done that.

(Shot grasshoppers?)
