that ball on the ground or in the air and throw it back before somebody gets to you. Whet they get to you that means ball sticks over your' head or somewhere or at your stick trying to knock your ball out of your stick. So it takes action men with wwiftness to catch"the ball and top throw and I like 1 that because I use to run. I thought I was fast, but one day my own kinfolks, them young kinfolks got to started playing and they were fast too. They got they must lave been faster than $I$ am, so they started catching me and hitting me so I kinda watched it there after and played wisely and $I$ enjoyed playing Indian stickball game. Match game that is, sometimes we put on exhibition around Holdenville. People come out, really enjoyed watching the game even those that it seem rough to them. I know the spectator would just gab ab their head when they seem somebody get hit' out there and that's just the way it used to be. I don't know how they are now, but it was lot of fun and good sport. Makes a man healthy and wise. and how to take care of himself in a game like that.
(Didn't you say something about an Indian doctor scratching your legs or arms for you to be fast? Or' was it for something else?)

Yeah, it was that and muscles to grow on four legs and calf of leg and your arms, forearms and arms where it will make muscles on you and when they scratched you why that was, you had not ate b er fast, you were fasting, taking medicine during the time they scredchoy you, both places to build muscles and be strong, but it had to bern particular person, too. Like we 1 said about clan, bird clan or beaver clan. brother like, another elderly beaver man, 酸, to scratch me because he was my uncle in that Iinefiso, it had to be hit elderly one. We call that kind. of person my elder. So, he haas the one that scratched me. It wasn't needle it was thorn.
(After, they scratched you le me win did you have to go to the fiver or something to take a bath zr
