

teaching. I've had some that pastorial teaching in or extension seminary here in Muskogee. This is something that I believe that would be great for upcoming generation. I know that I expound the words love and understanding with our young generation at the pulpit a lot because I believe that time is here and that we should train our young people any time. I would taught with just a little more strict to it. Somehow or another, I guess I just played the role of the Prodigal Son and just kind of moved out, but I'm back, I'm just like the Prodigal Son; I'm back and I know that the Lord has put that fine robe on me, and He put a ring on my finger. He put shoes on me, He just made a different man out of me. I believe that this is one of the greatest things that could happen to anybody, any person, no matter what age they may be. They can be very young or very old. People never get too old to learn. This is one thing that I would love to teach. If I had the opportunity is pastorial teaching, I would just love to point out that the position that the person could stand, and how to put action into their reading. I believe that this is one of things that I think needs to be taught in all the churches. I know that many of our young people of our race of people just relax before a group of people that they want to lean on something that, when you relax, you just lose the attention that you have captured. This is some of the things that I would like to talk to people that are leading out in this day and time in church work. I guess we can just talk from here on out.

(It's getting pretty late, and I guess you'll be going to bed pretty soon but that was real good, and I'm glad that you, we came over here to talk with you.)

Well, I'm glad to give my testimony at anytime. I know that I would have loved to have gone to your church. Like it is now, we still be having Sunday School every Sunday and preaching every Sunday and, but some of these times, we'll get together and give praise to the Lord because He is responsible to all that hashhappened in my life time, the good part.

(Well, I thank you.)

Um-hum.
