

INDIAN WEATHER SIGNS

(Do you know of a Indian signs, somethings like--I'll tell you for one. If you see a moon with a ring around it there's so many stars inside of it in the wintertime and that's going to be that much bad weather day. Do you know of very many signs that Indians used to go by, you know.)

Well, mostly all went by signs. But I never did notice. Daddy used to say in the summertime, he said, "The moon got a story in it and it's going to rain in one day." And it always did. Then a circle around it they said it's going to turn bad. Or it's going to have bad weather somewheres. That's all I ever heard about that.

(And you don't know of any other signs?)

No, I don't about stars like that. I don't guess we wasn't watching things like that. I raised with older sisters than I am. I was with them all the time.

OPINION ABOUT PEOPLE GOING TO THE MOON

(What I think about these people going to the moon?)

If they ever get there one of them be dead or all of them. If they ever get on that moon they'll be dead. And they said they brought some rocks down here, back. But now they dead.

(You don't believe it.)

I don't believe it. And that's what makes it hot. They got close there alright. That's what makes it hot. Then the older folks used to say all the nations be in war. And then Jerusalem, Isarel will get in there. Said that's the last of the world. And they's in it. And you just as well get ready for it. My grandmother, daddy's mother, used to say, "You all something flying ain't go no breath. He said, "That's going end of the world." And there's the airplane. I guess that's what they meant. I watch that. You know,
