been through the Subtai that the Cheyenne acquired the Sun Lonce, a major ceremonial complex found in all Plains tribes. The Subtai dialect continued to be spoken until fairly recent times.

Eventually the Bent brothers established a trading post on the Arkansas River near the mouth of the Purgatoire for the purpose of dealing directly with the central and southern Plains tribes. The Cheyenne, who had become dependent on trade for such items as guns, steel axes and knives, iron and brass kettles, metal dishes, flint and steel, wool blankets, beads, tobacco and cloth, gradually moved south and west to a range which included much of eastern Colorado and western Hebrasha and Kansas.

Ninetconth Contury Plains Culture '

By the carly 1000's all the Cheyenne were fully committed to the Plains. The econory was based primarily on buffalo hunting and equestrian nomedian. Food, of course, was mainly acat, but this was supplemented by wile plant foods such as plum, there cherry and Indian turnip, as well as borbiculturel produce obtained by trade from the village Indians. Like other Plains tribes the Cheyenne lodges were tipls, or conical tents, whose covers were made of buffalo cov skins carefully tunned and fitted and sown together. Clothing also was made from tanned skins. Rawhide was used to make containers and for moccasin soles. The pericardium, bladder and powneh of the buffalo were used as water containers. The pounch was used also as a pot for boiling food, being suspended on a frame of soleks while the water was heated by the addition of hot stones. Glue was made from the hoofs. Dippers and ladle's were made from the horns, and ropes were braided or twisted from buffalo hair. Tools were made from certain bones.

Almost all parts of the buildalo were caten. Tender parts of the aninul were broiled or roasted, and the tougher parts boiled. / After a large
