Well, that woman took him and she raised him. And he was named after them--he wasn't named after his father. They called him Daniel Black Horse, but his father was Broken Rib. And when he was born his mother died, and he didn't have no place. I guess my mother used to nurse him, too. Until his father found a place for him. That's the way he found a place. And this woman took this boy just like her own, but she used to call him n ε θ ε ' ε θ ε . She was a cousin to that man.

(If a woman nurses a child like your mother nurse him, would he ever consider her a relative or call her n d ' d -- ?)

No. When they're little babies, they just, you know--when he cries his grandmother used to bring him over to my mother. She'd nurse him. And after he nursed, they'd take him back. And then when that woman lost her baby, his father went and asked that woman to go on ahead and nurse him and raise him. She raised him.

(She called him n ε θ ε ' ε θ ε -- That would be "nephew"?)

Yeah.

NATURE OF TEASING BETWEEN WIFE'S SISTER AND SISTER'S HUSBAND

(I think you were telling me one time that a man can joke with his wife's sisters--)

Oh, yeah.

(--and call them wife--)

They sure can grab them, too!

(How is that?)

Oh, they tease them, you know. I wouldn't want to tell you--they always tease them nasty!
