with the old people?)
Oh, well yes. I think some cases, they tell em that if they be willing they be put on a budget. And I think that's a wise move, because you take the older pepple can't get out and work. well you take anybody even the white person, they take the money and they just throw the money away. They broke and without..really disconraging sometimes to think that.
(How many of the Wichitas have regular jobs?)
One night I was thinking..people I know, that has a permanent job is 57. Yes, course somenights as I lie in bed I think of our people away from hame. We have some in Callfornia Arizona, New Mexico, Nevada, State of Washinton. We' have one in Washinton, D.C. some in Kanses, in other words, I just guess.. I man I counted about 57 there could be more or less, but around 57. You know one thing I'm really pround we have pne man that's second to that big man in the employemnt office in Oklahoma city New Murose. ${ }^{*}$
(What about the other sile of this? Are there many Wichitas dependent upon ADCn and Trelfare?)

Well there's perinaps not too many. Where there' family separation, divorce or something they ask for $1 t$. The woman gets on a that state aid on that side. Other than they live on their income. Some people, I tell you they receive good income. I know ope of my cousins' daughters, she recetres around four or five thousand, just from rentals. That's pretty good money if you just manage the ,thing right. Not taxes.
(Are most of your oeople who are out of state go out on relocation programs?) Well, no. You take all..might be one or two, but most of them just been out there before this thing began, working. Youtake those boys out here, there's about eight oi nine in California. Well they were out there before World War II started after it. Other words they went out ther on their own. (Are there any Wichitas that have been relocated through the office?) No, I don't harliny think there is. (What do you thinis of the relocation program?)
