

THE WITNESS:

That's right.

Q (by Mr. Trapp)

And my question

is: how much do you show of that section -- of that section how much of the acreage do your records reflect?

A Our records reflect ownership of all but 30 acres out of the 640.

Q All but 30?

A Yes.

Q Now, of that acreage, is it managed in the same way that the other acreage that you have records of within the Kenwood Indian Reserve are managed? In other words, is this property in Section 32 managed in the same way that the remainder of the land that the Bureau is concerned with is managed? Is it all, you know --

A Yes.

Q Now, what is the scope of that management, according to your records, Mr. Daugherty?

A There is a Board of Trustees that actually recommends the actions to be taken in connection with this land and on leases and this land has been, for the most part, leased to various individuals and is presently under lease.

Is that what you mean by management?

Q That's what I am trying to find out, what the management of the Bureau has been.
