

No, he takes pills. He can't see either. The doctor told me, one of his eyes is really damaged from that sugar. And then he can't hear at all. He can't use his legs. I don't know what, they call disabled. They won't help us at all. Because this is my land right here, in my name. Its mine, individual. Well, I got another inherit land, but I'm the only heir to that. But he's got inherit land, but it really don't belong to him. It's not in his name, it's in his mother's name. And his daddy's name. And he really don't own the land. That's why he can't get no loan at the agency. That isn't his land. He don't have no land by the rights at the agency. Like me, I could get a loan. But I go all the grocery buying. And I just can't hardly afford to get the car repairs. I have to do that, the car repairs.

BORROWING MONEY AND INTEREST RATES

(When you borrow money from the lease man, how long does it take you to pay that back?)

Well, he gives me my lease money, all of it. Just pays it right there, pays all of it. Interest goes High. But sometimes when I borrow the money, I pay the interest right there. But if I don't have enought to do what I want to do, why I'll have to wait until January, pay the interest. It's big, it about twenty dollars.

(Do you pay interest when you borrow from the lease man?)

Yea, to the bank.

(If you borrow from the lease many, do you pay interest?)

No, it's just their lease money. But when you go to the bank, of course, you have to pay interest at the bank. That's where they pay the interest. They either take it out now...lot of times, I need about hundred and fifty, and then you know what I have to do, that goes all into my car. And I just tell him I can't pay the interest now, because I won't have enough. Well, he'll just let me have that. But I can't just go over there and borrow it. I have to get one of my lease man, because they owe me the lease money.

(About how much money do you pay for six months on about a hundred dollars?)
