They went...it's connected with doctoring. They went to that Deer Clan. My grandmother told them it was hard. But if you two want to go over there, you all go. They say, alright. But you get something out of it. People...my people, they gone three or four days, maybe, go out. Maybe fast, I guess. Well, when these two went, it's a Deer Clan, they sing...they got a song. But they eat...I don't know what they eat. But, I don't know... they must eat them mescal beans, them red ones. I guess you saw them. I guess that's what they eat. But probably they got to crack them, grind it. They give it to you, people that's running it. They give it to you. I don't know how much they going to give me, kind of make you sick. Couldn't hurt you. Well, telling about these two, you know, her brothers. They start cracking in that ceremony. I think the oldest one, he start crying, you know, hurting so bad. Can't do nothing about it you know. I don't know, he cramps in here. Probably that medicine that makes it. Both of them. But the youngest one, he stood it. Yea, he stood it. Come out afterward, they all right. They members of that clan. What I mean, they got something out of it. They became Indian doctors, them two. That's what they went there for, get something. That's about all I know about these, you know, old times. But we don't know about that. Like you say, they was lot of Wichitas one time.

One man, I stay with, he tell me one time there was 15,000 Wichitas in the mountains. I could of learned lot of things if I listen to him. He said there was 15,000 there one time.
