

I really don't know.

(Could people go out and look at the lands?)

No, they just allotted us, put us wherever they wanted us. Because my grandmother used to say, she picked out one land, and told that man that's what she wanted. That's where our home used to be. I want to stay here. Instead of giving it to her, they give it to somebody else, and they threw her way back west.

(Who got the land she wanted?)

Who's allotment was that, now, that we used to live in. I think that was one of my uncle's wife's place. We had all that place, look like it covering 160 acres, but all the rest of it, I guess, we had about 640 acres, cause we had too many cattle. And that hit the creek, and we never had to be bothered with water.

(But they scattered the Wichitas around?)

Yea, in Caddo County. Yea, but they allotted the Wichitas in this part right here. When you cross the river, from Anadarko, the river's the line all the way across. And back this way... and it reaches clear over... We got a place south of Hydro. That's good land over there. We get right around... we get close to \$2,000 a year. Real good land. And right in there, in back of this, we all back up in there, and it cuts on across close to Binger... back south, on back this way. And the others is Caddoes and Delawares... there's not much of them, they around in Washita. Wichitas and Delawares are together, looks like. Anything we do in the council, they got to be there, and we got to agree with each other.

RELATIONS WITH CADDO AND OTHER TRIBES AND MEXICANS

(But the Caddos are farther north?)

Yea. But they call us the affiliated tribes. I guess we been affiliated a long time, that's the way they call us. Now this chairman we got, ... we had some money. And we had to share with the Caddos, cause we're affiliated. And Caddos, they had some land in Louisiana, and they win a case, we don't get a thing out of it. Somebody said, why can't they share it, too, cause we share with them. Whenever we got our annuity money, they got it, too. Why don't they share it too. Well, this boy has been
