or forty dollars. You'kplow when I sliced meat for them, they said, "Let's go visit." Well, we went. And they were playing with these Suttons. My gosh, they went and onef cash out forty-two dollars, and the other one thirtysix dollars, and over here eight dollars. They had over a hundred dollars in the pot. Now whoge money is itan'd like to know-unless'it's Madiline's. Them Suttons won. Sally, she got thirty-eight dollars; and that one she calls Nancy got forty-two. Ald then that girl that's married to a white boy-what's her narfe? Georgia--she got twenty-four dollans and eighty-five cents.
(Is that one of the Suttòn girls?)
Yeah. And then fhat Charlene, she cashed out eight dollars. And Floyd cashed out fqur/ 6011 lars . That was all that had money. They rest were broke. I' always looked at Madiline once in a while-but I think she was feeling bad whed that money went. She had a sad face on her. And I don't know how.I'd fqel if I'd'lose that much. "Oh, I'd hate tol Let me tell youm-" when I want top play, I always just take maybè two dollars. And if I don't " win; that's all. But if I win', then I'm happy to win. I don't like to lose more than five dollars. Because money, is hard to get." And then besides I'm by myself and I'm having a hard time, and why should I go and throw money away?. That's' the way I feel.
(What ,kind of poker do they play?).
They play both--draw and stud poker. And then where they get me is where they--they "play poker, but then have "ten," "four" and "deuce" for wild cards. And' I tell you, some of them always have five aces', or six aces-l They get me there. Then they play this deuce wild. And joker. Joker and deuce wild. Then they say two"card draw. They have to draw two or threem-three-card draw.. (correcting herself.) They throw three away.
