

ever he took from the tribe. But not all attended cause people there were few.

(You mean Caddos didn't?)

Yes, no.

(Are there many Caddo today that go to meetings?)

Oh, you'd say about 25%. That's about all of the whole population.

(Do you happen to know what this name Moonhead means?)

Moonhead? It's just English, just means moonhead, that's all.

(Was that his Indian name?)

Yeah, that was his Indian name. (Says Caddo name for Moonhead.)

OBTAINING PEYOTE:

(I'd like to ask you too about how the Caddo go down and get peyote?)

Well in the past I think they purchased it from these various shops. Especially the..mainly around here, I knew that Dick Tingly had some Mexicans of..of course that was out of my line, so I couldn't say positively but anyway they went to these shops and got their..I don't know what year it was; I remember my husband talking about it. There was a letter pertaining to that..I think that some sort of narcotic or something was injected into these peyotes that were purchased from the white people. And so that was when the..now I couldn't say just what year it was but anyway I remember them talking about it. Then they passed the law that if the Indians were to use this they were to go after it themselves. So now from that date on, I don't really know, that was along before. I'm not positive to the year or month, but I had seen the letter pertaining to it. So they, of course we had interpreters then and that's when I heard it. That they were supposed to go down and pick the peyote temselves.
