

(Now, that would be what?)

Yeah, that means, when you, that arm, you got it on your left arm, you know. You hit it.

(Do they guess -- do they guess two people?)

Yeah, you can hit that way, you know. See on that left, you could hit it left.

(Yeah.)

On your right, this way. Then on the, on the side, you see there's just two hiding.

(Yeah,)

Well, you can make a, make a motion like that or some of them used to go this way. And sometime, well, they hit in the middle. Well, they make a -- their hand like that.

(Yeah.)

See, that's in the middle. Good game, you know, when it's, you know, lively. Maybe, nobody try to cheat or anything like that.

(Yeah. Let me try this. Okay, if they guess, you know, somebody guesses, and doesn't -- doesn't get either one of them, well, what happens to those sticks that you're counting with?)

Well, he, if he, you know, if he, the one that's guessing, you know, if he don't get both of them, you know --

(Yeah.)

-- Well, they score, you know, on their side, whatever side they are, you know.

(Yeah, yeah.)

Maybe, they're on this side, maybe, the guesser, maybe, he misses a two.

(Yeah.)
