

(And I just wonder, you know, when you're guessing, the kind of thing that -- what do you do? You look at their face or -- ?)

Well, their eyes or -- hand game, well, any person, you know, they -- they got just one place to put it, seem like. It don't seem that way to me, you know. Sometime -- sometime, see they always -- it seem like they always guess on the left hand side all the time.

(Yeah.)

Sometime, they're right. And mostly keeps it -- arm keeps it on the right there. Yeah, right there. It's kind of hard, you know. Well, sometime, you know, they go -- they hide quick, you know.

(Yeah.)

But I think mostly, you know, the way I look at it, you know they -- they go down quick, you know. Well they put that bead on the other hand, you know.

(Yeah, yeah.)

And sometimes, you know, it takes them a long time, you know. They come, and sometime they keep it. There's lot of guessing too.

(Yeah, yeah.)

Maybe, sometime, they keep it in the same hand.

(Yeah.)

Or sometime, they switch it, you know.

(How -- how do they -- do people take turn hiding and guessing or how does that work?)

Well, way back in years, you know, like if they -- if they got seven, they -- the one that starts the game, well, he's one of them. He get -- let's see, yeah, he's one of the seven.

(Yeah.)

Then, the one that's keeping the sticks, well, he's one of the seven too.
