

(Uh-huh..)

I think it's on this side. That's where it's got the on the end, got two--you make a knot on that bow where the string could go round, you know.

(Yeah.)

Tie it hard, the way it hold, you know.

(Yeah.)

Then, give it--on the left side, you just put one--one, say, groove. You just put a groove way in there.

(Yeah.)

Where you can put that string go around and make a, you know, make a knot.

(Yeah.)

You put a string--same kind we bow like that, bow as much as you want, you know, far as it'll go, maybe, about that much. Then, you tie it.

(Yeah, yeah.)

It's got one groove on this end. They put your string that way. You go around. I think you go around this way.

(Yeah.)

Then, you pull it.

(Yeah.)

You pull the string, and bow to get it bowed, you know.

(Yeah, yeah.)

Then, you tie that. After you get through with it, well, you loosen it.

(Mmm-hmm.)

Loosen it, then, you know, let--leave it kind of some kind of bow on, then, it comes down. They want--they don't want to keep the bow all the time, you know.

(Yeah, yeah.)

You got to let it rest, I guess,
