

(Cecil and Jenny talk in Kiowa.)

(You said there was some feathers that they were supposed to pay and you couldn't remember what bird. Do you remember the Kiowa--)
Wait, he might. (Speaks Kiowa to Cecil) Black handkerchief, buckskin and feathers.

(End of Side A)

SIDE B

Cecil: One eagle feather. That's what he wants when he's going to doctor you. And then the first thing that he want is a smoke. You take a cigarette and before you get to him you make that cigarette and you give it to him and when he smoke it, he says yes, he's going to doctor him. He wants a smoke, a black handkerchief, buckskin and eagle feather. Four. But when you get well and you feel healthy, maybe you add something. That's all right. But the four main things you got to have before he doctors you; cigarette, eagle feather, black handkerchief and a buckskin. You got to have those. Why, we don't know. That's the way he doctors.

STORY ABOUT TREATMENT OF POISONOUS SPIDER BITES

(You know, you said that there was some other--)

(Cecil: There was a spider too. He's an important spider doctor I think.)

Yeah, he doctors on poison black widow. If a poison spider bite you, well, he can get you well.

(Well, tell me about that.)

Well, I got it my self. I used to think that he don't know much. I guess he don't know much about that. I always thought that. One time we had chickens and I was driving them little chickens, you know, the little ones in the chicken house. The rain was coming.
