

No, they're, you know--they're round. You don't cut this--They still round. And you get the stick and kinda string those pumpkins. Hang them up there. Put 'em up there, you know. You put three, four poles up and you put them up there. But every day while they up there, you just have to kinda turn 'em around. So, where the stick is, they don't get dry here, if you don't turn 'em round, they get stuck on that pole. You just have to keep working 'em and these others. ((Tape runs out))
