

in providing the information to the Department. I don't know what is contained in here.

Mr. P.: Well, I'm not sure I'm following you. Are you saying that the issue is not identified?

Reference: Basically, yes.

Mr. P.: And I would suggest that it has not, it has been; the department has offered contention as to what the issue is.

Reference: That's correct.

Mr. P.: Fine.

Reference: In my opinion, what issue has been identified as to the basically, the one involved that were included in this final decision, that is the event that has not been identified and that should be included in the hearing summary.

Mr. P.: The procedure you have in mind is one where the Department, locally, will have evidence their hearing summary?

Reference: Well, it makes no difference to me as to how we proceed from this point on, that the very basic issue has been identified, if you want to present your or have the county present its information, it makes no difference to me. If you have no particular suggestions or objections I'd suggest that I go to provide us a basis from which to work, that we have the county file and record the hearing summary of 6-10-60.

Mr. P.: Well, fine; and they let me set forth what I think the issue is.

Reference: That is your privilege.

Mr. P.: Mr. Powers, let me be heard and let me reserve my objections to certain things in it until it's completed, rather than interrupt her hearing summary.
