

(How did he get famous?)

Just because he wanted to be a chief of the Comanches and these Qua har ahs (Antelope Band) they took him as a chief for their side over the mountains, you know, and so he went around and told the government, the president at Washington, I guess--told them that he was chief of the Comanches, That's how come he become chief of the Comanches---become chief of the Comanches.

(You mean he told them he was chief?)

He told them he was chief of the Comanches.

(And they just put it down that he was the chief?)

Just put it down that he was the chief.

THE QUAHARAH GROUP:

(What was this other group you mentioned, Quaharah?)

Qua har ahs. The group over the mountains. That's where he lived.

(What, these Wichita Mountains over here?)

Yeah, over them.

(On the other side (west side) on the other side of Mt. Scott?)

On the other side of Mt. Scott. That's where them Quaharaha are over there. They live over there.

(Now which people were these? That Quaharah, does that have a meaning?)

Well, Joey (her husband) is one of them. He is one of the Quaharaha. There's a lot of Indians back there.

(Does that have a meaning, the word?)

Quaharah is--like them little antelope. That's the name of them, antelope. I don't know how they got it. Maybe they--when they was out on the plains--that's the only thing that goes on the plains, you know. Graze out on the plains, that's where they kill those quaharaha. And that's the only thing they eat. Quaharaha, they antelopes. They out on the plains, but on further down this way deer and moose.
