

Uh-huh. It's just Indian territory then, you know.

(Before 1907, huh?)

Yeah, and I'm 81 years old.

(Eighty-one?)

Eighty-one.

(Have you just had a birthday?)

Last October.

(Last October. ; Your in good shape, isn't she?)

If I didn't have so much of this rheumatism that's what (--) my doctor says is all over my body. I had heart trouble last August wasn't it? I sure had it, it just barely did pass through. That's what made me go down, you know. That's what made me so weak. I can't do nothin. I want to do something' but when I try to get out and do something I can't do nothin. I get so weak. But the doctor told me I got to quit this doing anything and I got to stay out of the sun. Stay in the shade if I can. Because I'm liable to have another stroke. Well, it isn't a stroke, but it is just that heart go down. He said I may have it next time though, if I don't take care of myself. That's the way he's treated me yet. I take medicine, then I had pneumonia after that in November I think it was. Sure was--had a hard time.

(Pretty rough winter isn't it?)

Yeah.

(How about your other grandchildren? How many grandchildren do you have?)

I haven't got any. I haven't got no children. They just my step-children, that's all. We raised all those, she so little you know.

(Well, your lucky to have her aren't you?)
