

Colony. And another man moved his bunch up to Seiling. I don't know who they were. Cantonment is part of Seiling--and that's how come we have all these districts. They were first around Fort Reno and Darlington. And they worked on them day and night and they agreed to what the government wanted..(Rest of discussion is concerning the dispersion to present communities and districts and some discussion of the forthcoming claims settlement. But volume level is so low it can hardly be understood.)

(End of Side A)

SIDE B

CLAIMS MONEY" HOW TO BE USED AND ENROLLMENT REGULATIONS

(How do you mean?)

Ed: Well, when we first got this money, the Bureau of Indian Affairs stepped in. They wanted to create programs--have a program --like industrial development or educational money set aside. And they wanted to work out some kind of a deal where it would bring money into the tribe. But the Indians went on record. They had meetings and they went on record as wanting all full per capita payments. Just forget about programs. And a few of the boys and girls that had gone to Washington--a tribal committee--fought for that and finally got their point, and got five thousand set aside for educational purposes. And the balance to be full per capita. Her and I will get our part, see--if we live long enough.

(You say the rolls will close when the President signs?)

Just the minute he signs the bill and it becomes law. At midnight the rolls close. Any child born after midnight can't get on the roll.

(What are the rules about people who are eligible to enroll?)

They have to have one-fourth Indian blood.
