deavhs here within the last month right here in this town. ind there's two or three deaths at Canton. One or two deaths around Colony-ang the Arapahoes. But the Cheyennes, there's been a lot of deaths. There's one death amorg the Cheyennes here not too long ágo near El Reno. Nell, all those are by--not too old people--but young . people. Aocident, or sorething like that. When they could have rade use of their money if it was given out to us, say, in 163, lot of 'em woula have had the benefit of it. But as it is, they're died and that money's not available yet. That's what, hurts the Indians.
(iWhen they do :ake che payment, wi:I your daughter's boy's get a share of it?) No. They won't get a penrey of it. They'il get iheir own. Ihey'll each have their. own. hree of $t$ em--they'll get about ten chousand for the three of the -their share. (How uch would any indiviaual, get?)
..ell, uhey say the original recora, before t..ere's aiy intrest involved, in our judgement in court was about $\$ 2600$. iell, the Co mittee, through so e maneuvering, had five nundred thousan: dollars $s=$ aside for educaticn and tuition and scholarships of the tribe's money, . 'hich they really didn't have no right to without the consent of the Indians. Because that's our individual money. Like, your noney's all in your account, and riy rioney's all in ry account. $\because$ iell, what right, do tney have to take it, even though they have jurisdiction. That's by referenduri. sut that's wha: they did,' so we soria accepted it. But since thet ti e, he treasurer $h=s$ held tha: money a: four per ce.t interest. Four and a quarter ter cen* interest. .nd since last February we loaned ten million out to the bank of arerica of San Francisco at five and threeeights per cent, for six monihs, compiled auarterly. iNell, tha's ma ured. We haven't replaced that again unt $l$ the tine when it should be disbursed, at the same rate of interest. iell all right-we loaned four million out here to the First National Bank of Oklanona City at fivé and a quarter per cent interest. Six months, compounded quarierly. hat's matured, so that goes back in the ireasury. So through this interest from the Sank of America, ans "this interest fro" the Oklah ma City banr, and the four añ"a quaritr per cent fr:m the Treasury of the United States-that's probably brought it up about half a million more. So that woula be fore than $\$ 2600$ apiece. We think
