

the end, And both sides, they shoot with arrows. And they very good. That's an Arrow Game. They do betting too. Well, when they gonna gamble, they have another fellow standing over here that collects all that gamble. Maybe I'm a good shooter and that other fellow knows that I am a good shooter. And somebody says, "I'm going to bet for Cecil Horse." "Well, what's you going to bet?" "Well, I put up my saddle, bridle." And they bet there. They put it right here. We going to shoot and if I win, this fellow he take his saddle and whatever the other fellow bet against him. Why, he'll take his.

(Are you shooting these arrows with a bow or just throwing them?) They got a throwing game and they they got an arrow. The other game, the arrow game is--they're big. They throw them. They say they pick up four arrows, they throw it. Keep a-throwing those arrows and those arrows get close together. They count--they count from those arrows. Maybe they got one foot from the stake there. They count so much. If all those arrows got close together and touch one of them, well, they count big. Well, this other fellow, he got to throw and maybe he tied, maybe he went over. It's just like horseshoes. You throw horseshoe, you know, you make a ringer that counts 10 or 5 or something.

(Yeah, in one way to play it you use a bow to shoot your arrow with? I mean you use the bow and arrow?)

Yeah, you have four arrows. You have one bow. Well, you take and aim them and you shoot that stake. Maybe, let's see--oh, I don't know--about as far as here to that tree. Maybe a little farther. You aim and then shoot. Got pretty close. Shoot again and you got a little closer. Shoot and maybe you get a little closer and
