WITCHES AND WITCHCRAFT:

(The last time you were telling me about if a person came here and said they were witched they felt that way, you said you would take them out here some place.)

Yeah, outside.

(Would you just go sit out there someplace or...)

No out here.

(Could it be inside the house too?)

Yeah, it could be, if it's cold.

(But is it best to go outside?)

It is best to be with them by yourself...where other peoples won't hear what you're talking about, what you're doing.

(Let's say if somebody came here and had twisted face and you had to take them in another room where you'd be alone, is there any special way they should do? Do they sit down or lay down, or what do they do?)

Sometimes they lay and I could fix their face if it's crooked, or if they witched...it's mostly in the head when they get like that. It seems like it's sweaty up here all the time at the top of their head.

(If they're witched?)

Right here, yes. (top of head)

(Why do you think that is?)

I don't know. Foamy stuff. They don't feel it but it's wet up there. Sometimes their hands get twisted..both sides or either this way, but usually all the time it always be like this. (hands like fist, but at wrist and curling toward body). It..very often they go like that... hands go like that.

(Palms twisted out?)

Yeah, it always be that way.

(That's if they're witched?)
