

business. There's a lot of other things we could talk about, that benefit you. There's things the committee can do for you. But that will come later on. So I just wanta stress that, how the superintendent was so agreeable. We been hittin' stone walls we been to two different area directors, we been to one former superintendent. Everyone of them have refused to call meeting's of the tribe and that's how come we're back a stalemate. We haven't been able to move no way or another. We've got a lot of money we got tribal land, yet, these things are important. And I'm afraid that if our tribes are foolish enough to go along with separate organizations I think in time one of these 3 tribes will be terminated the same time. But that's what it would lead to. They will turn all of this business over to each tribe that's in the making. We been keepin' up with a lot of these things and as we go along we see how they handle the situations of other tribes. And that's the way it looks. But if we stay together under one constitution it's gonna be pretty difficult as you all know. And another things I want to pass this on why I am also against separate constitution. We have in our tribes all three a lot of mixed blood and we have some that are Kiowa and Akpache some that are Kiowa and Comanche and also Apache and Comanche. And some that are all three. That's who you gonna hurt. If you support anybody that is wanting a separate constitution. You gonna hurt those people and they may be your own. So I hope you all don't ever go along with separate constitutions. We found out Sat. That the Apaches were in line have a sperate constitution we saw it coming right from the people that meeting. So I just sorat want you know that it might com up Satu. I hope it don't, but it might. There is already a written a
