

it to them so they could pray and doctor it. So he doctored this boy's arm too. Had to be 2 days until she finish him so doctor him. His arm got all right. Of course when we get through doctoring them 2 days, then I have to give Mary maybe dry goods or bag of groceries. Our folks believe when somebody doctor you like that--when you give them groceries to eat they say--they eat all that what happened to them all away. That's what the old folks think. So I always buy groceries for Mary.

(How did she doctor his arm? Did he tell you?)

No, we don't stay in there when she doctoring. We have to stay in living room.

(How long would he be in there with her?)

Oh, just not too long. Just long enough to doctor him. She's got some kind of medicine she use and she uses these cedars you know, growing out here. You have to dry them and she put them on the coals and that's how she doctors and some other medicines she's got. She put it on there too.

(Do you know what that other medicine is?)

No. I don't.

(Is she easy to get? Is she a good doctor?)

Yeah, she's good doctor. She cured lady over there too. That--and she had a stroke and she doctored her and got her well too. And another girl too up here. That where I heard it for first time. I told them my son had a stroke when we was having prayer meeting. I told the ladies my grandson had stroke and that tady told me she say, my daughter got that one and we took him to Mary and she cured her--why don't you take him over there. That's how I find out that Mary's a doctor then I
