

(Who did?)

Mooney. He was in there and next day he come out and he'll say, "It's a good church you all got. But you all got to have a name for it. Two things," he said, "Charter, and put up a flag. Everytime you have meeting put up a flag before you"... Like if I'm going to have a meetin' tonight, if I'm going to have a meetin', I'd put a flag up,...tomorrow put it up again.

(What kind of flag?)

American flag. You all get you a charter like the white people, the churches you know. Get a charter just like the white people, you know he said, theres two things you can pick up the charter. And that's where they're standing today. They're having alot of trouble over it. See, they have to pay for the charter every year. Well, you white people paying the same amount I guess. Ten or twenty dollars a year or something like that. And the members have to pay so much a year. Tithes, and everything like that. It's the white man's way they got. But if they put that flag up you know nobody have to let the flag up and then the tip up and they can't come over here and stop them. If that flag was there. And the next day, aiter the meetin', they put the flag up again. But they got that charter. And a lot of them say, that's where they think we done wrong. That's how come they're having lot of trouble today. State of Oklahoma got a charter now.

(Why what kind of trouble are they having?)

Well, there's lot of talk going ---like this LSD or whatever you call it. Over at your school over here at Norman. That's where it happened. There's lot of that-- they say some of them students use this peyote. They're trying to dass it in there with that. (LSD, etc.) I think they took it out of it. That McCarty, I think he's the one that was gonna introduce that bill but he---you know what happened. But I think they took that peyote out of that----McCarty. (James comment here refers to recent publication on O.U. students caught with marijuana, LSD, and other things.
