

right, began to eat and feel good.

Mrs. Osborne: Said she drew out a lot of that stuff she had in her, when she got through doctoring her, Uncle Paul said that. Said, got soup too. See she wouldn't nurse or anything. See her mother nursing her children, maybe about 2 years old they still be nursing. And Helena just went to eating and all that blood and stuff had come out of her lungs you know. See how them light coals, they put them in their mouth, just something that they used I guess.

(Pawnee words)

Mrs. Osborne: That heat just come out on her. In her chest.

(And did he draw this out of her body with his mouth?)

No, he just blow it on her. It come out. It come out of her you know. Just heat that inside and come out.

Mrs. Osborne: Put it in a can.

#### HEALING A CHILD WHO WAS BURNED

(Another one that I've heard--I think Pop may have said that this happened, this incident happened at a Doctor Dance Ceremony about some little boy that got burned. Do you know anything about that?)

Yeah.

Mrs. Osborne: Do you remember? They said it was Jim Peters.

I don't know, I wasn't there at the time.

Mrs. Osborne: The way they said they just put him in that hot soup--just dipped him in there you know. Said it didn't leave no scars or anything. It just burned him, set fire and just heat it up good and put it right there and let it burn, and then take it off, it's all right.

(That's the way they believe, huh?)

Yeah. They put it right close there where he was burned, put it right close and feel like it burned.
