

said, "They want you over there. Go to doctorf." And she was just about ten years old. She went down there and she said, "What's the matter?" Said, "Your little friend died. We all ready to take her up to the mountains to bury her." She said, "No, no. She's not going to go. I don't want her to die. I'll fix her up." She told all those people, "You all get out, I'll fix her up." And she know she was sitting in there making all kinds of racket and pretty soon, she set up.

She come back to life and she lived many years. My mother died, before her. And it was about six or seven years ago she died. She lived that long. She come back. (And your mother was just ten years old when she did this?)

She was just ten years old, when she doctor her. She said, that she was just about the same age as her. They were friends. They were play together. All at once she got sick and died.

(When your mother gave you that egg, and you said before that she painted you up, did she do this all at one time--then you could doctor?)

Yeah, just one time. On the time that she gave it to me.

(You said at one time that you couldn't eat some insdies of ~~huff~~ beef--liver, or something?)

Guts.

(Was that one of your rules?) ((I.E. TABU ASSOCIATED WITH HER POWERS AS A MEDICINE WOMAN))

No, that was just on account of my uncle. He was ka doctor and my uncle don't eat it and he don't want all of us kids not eat it. Because he can't eat it, after they killed that beef they always take those guts and throw it away. And that's the main part that everybody likes.

(But that didn't have anything to do with the rule for the doctor?)

No.

(When you got this power from your mother--now, coming along through years, is there any way you can loose it can anybody take it away from you?)

No. I just have it. You know, my boy getten older. He's a real nice boy, you know he prays and he don't go to church but he goes to this church ((PEYOTE CHURCH)).
