

(Then it goes from you to him?)

It goes from me to him--still I be having it, you know. I still have the power, like him, when he start working it, on anybody. But I don't know about him-- you know when anybody got headache right there and you put that medicine on there and you suck it out with your own mouth, and then got all that poison out of him. I'm going to ask him about that, but I didn't ask him about--he has to do it

(Whether he would want to or not?)

You know when--I don't care how sicken anybody is, you got to do it for them, when they come for help to you. You got to go all through that.. You got to go throught like that.

(Do you use those sucking horns?)

I got one but it broke. You know its like this. It got chipped off right here, like that. ((AT POINT WHICH IT IS APPLIED TO SKIN SURFACE)) Air goes through there, and it don't draw it up too good.

(Is it best to use your horn or use your mouth?)

Either one. If you ain't got no horn, you just got to use your mouth. I use it on two Shoshone young guys, when we got over there. Oh they was really sick, both of them--from different homes, you know. He told them, "Shell get you well right now if you all give her a smoke." You know they all give me smoke before they want me to doctor. Tell me what they want. And I can't refuse that smoke, I don't care who it is. When it come to me, when they give me smoke, and say, "I want you to doctor me, want you to do this for me," I can't refuse it. That's the way that rule goes. You just got to do it for them.

(Could somebody ask you to use your power to hurt somebody?)

Yeah, it's easy, but I don't think I would want to do that!

(But you can't refuse if its to help somebody?)

Yes. You know, right up today, there's a lot of people that--you know, a lot of people don't--they think that, "She can't do it. She can't do that like that." I hear people talk about me, you know. Like that, "She can't do it. She can't make them well." And other peoples talk about me say, "She could do it. She could get
