

down that way. And these other relations - they all claim him - they're from his daughters. (A question in the background - not clear) Did you see that in the Sunday papers? Well, she is descendent but that from the mother. So, I don't know what the deal is. Nobody ever said anything about it.

(In my interview with (name not clear) she gave us that whole (name not clear) band and that way she tells it.)

And Bill, Bill Burkhart and I - we're one branch - we got our own branch too. And old Grandpa (name not clear) and my grandmother and that's their brothers and we're on that branch and the parents on the other side - and that's where all this family comes from. That's the foundation basis of this family is from my grandfathers - my great-grandfather. He's the one that all these people descended from. He was - we got him - he was--must a been 1700's he lived, you know. Early 1800's, he got killed over here by Guthrie, (name not clear) father. And they buried him over there on that hill - there's a hill over there by Guthrie, I think it's right north, it is a little round hill. We been talking about that too, so maybe we can work somethin' out on that too. We want to put a marker up there for him, - this old man - he got killed.

(Name not clear) father)?

Yeah. This (name not clear) father. He's the main man where this family came from. When he got killed, I don't know whether it was on war party or buffalo-hunt. But anyway he got killed over there where Guthrie is now. They buried him on that hill. All those things I could talk about.....

(Irrevelent question?)

So, that's about the way that the thing goes. 'Course, they got lots different stories, different history happened and there's stories to them and all those things like that.

(Well, was this man, was he Roan Horse's dad?)
