

see. They--so actually I thought if they hadn't listened and if they hadn't bought this land, well I guess we'd a been jest kinda like a sacred tribe from these other two groups, 'cause they had all the clans. We got, just like Otis Russell, he belongs to that Sun Clan. M _____ Keen, his dad used to --- they call M. _____ Keen. Well then _____ this old man here, well he belong to that. Well he's M _____ K _____, Wadonnicka, see. This old man Meek is. So we got that clan and you jest find all the different clans. Jest like Honicka, I guess there's Honkas, I don't know any --Henry and them they Honka, but I'm related to them too on this, my mother's side. See that's my mother's clan. They're Honka, then Burrells and, but my clan is Honka. Honka old time, see that's the long and our people they always talkin' 'bout that lone eagle. Well that's--that's our names, see. And then these clans that they had when they had these clans, see this Joe Mathews, not Joe Mathews, but _____ (name not clear) why he wrote 'bout that and he's got those clans as lined up, just the positions they have when they in session, when they in order, I guess. Well, then this, my clan, well it's over here, it's by itself. These others they go this way and they go this way. But my clan is here and in order to function, why they go through this clan. And that's one thing--I said these Osages they jest, not jest 'cause it's me, but that's one thing, maybe they don't know that, but they siad this clan, if I would put my approval on that, well whatever they gonna do, why it's gonna go that way. It's gonna be that way, they said. That's the way they found--they use it. They use that clan, he's by himself, he don't go round, he don't go round too much, go 'round these other people. But they know when they get in order why he's got his place, so that's the way that is. So that's Honka, they call Honka. They got other Honkas. Other clans. Same clan, but it's separte they got them kinda in ranks. All like that, that's the way. So that's where all my biggest--I got my mind set that way. I done told Paul Pitts,
