

(84 years old. Well, that Indian medicine is remarkable now.)

Mary: I wouldn't thought about a skunk. On a cold or something like that skunk oil is good. Even in the wintertime, it's a fact, that when the kids are trying to have croup and a head cold, just give them a teaspoon of that. If it does not agree with him, he will either vomit or sick depending on how you take it.

(What does terrapin meat taste like?)

Turtle.

(The remainder of this tape concerns the disappearance of eels from northeast Oklahoma streams since the construction of dams on the rivers, the gigging of fish in Spring and on Grand river, and also the finding of a turtle in Spring Creek that was too big to handle. However, because of so much static interference it is not possible to transcribe this part of interview accurately.
