

Cecil: P<sup>h</sup>neumonia.

Jenny: Somebody's dying with pneumonia, well, they get him and he doctors them. Cures them.

STORY ABOUT HUNTING HORSE BEING WITCHED IN THE BACK

Cecil: (speaks Kiowa) Now, I was going to tell you. They witch my father one time because of his looks. And this man was jealous of his wife. He think that my father was going with his wife. He witched him. He witched him in the back, right here (lumbar region). He witched him so he couldn't walk. He got paralyzed. So they had to carry him around. My father couldn't walk and they had a meeting for him--peyote meeting. And took him in there and took him in the rawhide and another doctor, Dr. Given--he was the one. He told that man was in there that witch my father. He said, "Now, if you don't get him well. He's a good man. He'd a leading man of our tribe. And if you don't get him well, I'm going to witch you and kill you." He said, "You better take that thing out, whatever you witched him with." So he did. He shot that, oh, witchcraft we call it, it's in the Bible. I don't know whether you read it. There's a witch woman that one of the prophets went to see something about something. She was a witch woman and God punish that prophet because, instead of going to God, he went to that witch. Well, that's a witch. So they--he took out that thing, whatever it was in the back. See, when he shot that thing, it paralyzed that spine or whatever--nerve and he couldn't walk, but he got it well and fixed him up. Well, now, that's a witch doctor. They doing a lot of that going on. And witching, you know, today white people believe there are witches, too.
