

heard a lot about education and this group says, for a while we are going to "zero" in on education and you know and I know that the greatest dropouts; the eighth, ninth, tenth and eleventh grades. You could have consultations with parents of students of that level and with the students that need some good guidance sometimes and some of these parents don't know what to do, they just need some help. But "zero" in and if you can just lick one thing at a time I think you will be a tremendous success. Ace, this is real exciting, its a tremendous new approach to this thing. Normally, we have been invited in to a group and it will be a great big community affair and we'll spend with the group--they'll spend and we will too--as long as six to eight weeks just discussing if they will organize, why they'll organize and what they're going to do first. And that's all right with us. We'll spend six months if they want to. And long as they stay together and face up to the fact that they need to do something. But this is tremendous the way you "zeroed" in on this thing and if we can help in any way at the University any sort of professional assistance with you; we have completed a resources survey just today and I know it isn't complete, we've been working on it for three months. I've got a least five typewritten pages single space, the State of Oklahoma of Governmental and private agencies who have offered indirect service to Indians. Hundreds of them. And quite often, I think that is the confusing thing. The Indian doesn't--with so many people at him all the time he doesn't know what to do or where to go or even go to. But again, if you can have an Indian voice here, sort of co-ordinate some of these things, I think it would be tremendous, but I never liked to take too much time because I want to be invited back. But it's been real exciting to me and hope you stay with it. If we can help, let us know.

Ace: Bob.
