

Cecil: - (speaks Kiowa)

Jenny: Yeah, we keep one because we might use it like we did on John.

Cecil: You want the other one, the horn that sucking blood. You want the other one.

(Yes, if you don't really need it.)

Cecil: I made it for her for sometime, you know. I'll show you.

(okay, I'd love it.)

Cecil: Right in here, you got a pain and then it comes through like that. Or you got a pain up there (headache).

(How about right here?)

Cecil: They do that right here. Sometimes right here. They do that because they claim that that blood sometimes gets up there and kind of clogs up. It's a waste blood with water. They take that out. That's what they claim.

Jenny: I done that on one woman. She's still living--Minnie, old lady. Oh, she had the awfulest pain. They used to live right here. She said just how much her head hurt she couldn't open her eyes. And she didn't eat for three days. And oh, she couldn't talk. And her son said she kept saying "Jenny" everytime she talk. She say "Jenny." "So I just made up my mind," he said, "She might want you over there. That's why I come after you." I work on her head before. And maybe she was telling him to come after me or something. But he come after me. And so I went with him. She was laying there just like in a coma. And I said, "Minnie, here I am. Did you want me? Your son said you kept calling me." Yeah, she didn't talk to me. So, I said, "I'm gonna fix you like I did before. You know she kind of put her head.
