

(Well)

And he get the meal from there. Just tow it on.

(Uh-huh)

And that's the way he got his meal.

(Well)

He run it by water. I know one time. He broke his arm on it.

(Yeah)

One of them belts. Like that. On that bone.

(Did that mill have a name? Or did they give it a name or was it Spade mill was it?)

I guess. No, I don't remember that. It's just an old water power mill. I don't that's all. That mill was named. I guess they called it Spade mill.

(I guess so. Yeah)

'Cause it's water running off on the hill, just a bluff. 'Course that spring is not as good as it was.

(Yeah)

It's a cliff. Way high. Looks like the water about that deep. Water coming off of there. Just pouring off of that. My dad made. I don't know where he got his lumber or something. And he made a pipe down there. And made a kind of a trough like. Run it down in there. And that wheel. And lower some kind of rock. I don't know what you call it. Cup like just hanging on that wheel. You know. Oh it just like that. Boy that thing really spin. That's the way he run that mill.

FATHER WAS AN INDUSTRIOUS MAN - GOOD BLACKSMITH

(Well your father must have been a pretty smart industrious man.)

Well I guess he had to be. He was a good blacksmith. They claimed he was one of the best around the country. The old man Burns they used to called him.
